in the northern section of South America, forming a land of more than 3,000 square miles.

3.5-5 - THE FORMER INT'L RESERVE OF AMAZON FOREST

Since the middle 80's the most important rain forest of the world was passed to the responsibility of the United States and the United Nations. It is named as FINRAF (Former International Reserve of Amazon Forest), and its foundation was due to the fact the Amazon is located in South America, one of the poorest regions on earth and surrounded by irresponsible, cruel and authoritarian countries. It was part of eight different and strange countries, which are in the majority of cases, kingdoms of violence, drug trade, illiteracy and a unintelligent and primitive people.

The creation of FINRAF were supported by all nations of G-23 and was really a special mission of our country and a gift of all the world, since the possession of these valuable lands to such primitive countries and people should condemn the lungs of the world to disappearance and full destroying in few years.

country and a gift of al  
since the possession  
valuable lands to suc  
countries and peop  
condemn the lungs of t  
disappearance and full o  
few years.

**Desde meados dos anos 80 a mais importante floresta do mundo passou a ser responsabilidade dos Estados Unidos e das Nações Unidas. É chamada PRINFA (A PRIMEIRA RESERVA INTERNACIONAL DA FLORESTA AMAZÔNICA), e sua fundação se deu pelo fato de a Amazônia estar localizada na América do Sul, uma das regiões mais pobres do mundo e cercada por países irresponsáveis, cruéis e autoritários. Fazia parte de oito países diferentes e estranhos, os quais, em sua maioria, são reinos da violência, do tráfico de drogas, da ignorância, e de um povo sem inteligência e primitivo.**

**A criação da PRINFA foi apoiada por todas as nações do G-23 e foi realmente uma missão especial para nosso país e um presente para o mundo todo visto que a posse destas terras tão valiosas nas mãos de povos e países tão primitivos condenariam os pulmões do mundo ao desaparecimento e à total destruição em poucos anos.**

**Podemos considerar que esta área tem a maior biodiversidade do planeta, com uma grande quantidade de espécimes de todos os tipos de animais e vegetais. O valor desta área é incalculável, mas o planeta pode estar certo de que os Estados Unidos não permitirão que estes países Latino Americanos explorem e destruam esta verdadeira propriedade de toda a humanidade. PRINFA é como um parque internacional, com severas regras para exploração**

countries and people should condemn the lungs of the world to disappearance and full destroying in few years.

## PARA FICAR INDIGNADO!

No dia 24 deste ano, o jornal "Estadão" publicou, sem destaque algum, e em três minúsculas linhas, a denúncia gravíssima de uma brasileira residente nos EUA:

“Os livros de geografia de lá, estão mostrando o mapa do Brasil amputado, sem o Amazonas e o Pantanal. Eles estão ensinando nas escolas, que estas áreas são internacionais, ou seja, em outras palavras, eles estão preparando a opinião pública deles, para dentro de alguns anos se apoderarem de nosso território com legitimidade. Nós somos brasileiros e, no mínimo, temos de nos indignar com esta afronta. Vamos passar este e-mail para o maior número de pessoas que conhecermos, e para que eles saibam que, embora eles não noticiem o fato, nós, povo, estamos sabendo.”
